QA Engineer with French – Hybrid: On-Site / Remote

Hiring organization
Digidemat

Employment Type
Full-time

Industry
Software QA

Job Location
Bucarest

Date posted
February 17, 2026

Valid through
01.06.2026

Description

We are seeking a detail-oriented **QA Engineer** to ensure the highest quality standards for our diverse client portfolio. You will not only be testing software but providing a premium QA consultancy service, ensuring that our clients' digital products are reliable, user-friendly, and bug-free.

Responsibilities

- **Test Planning:** Analyze client requirements and create comprehensive test plans, test cases, and test scripts.
- **Execution:** Perform manual and/or automated testing (Functional, Regression, Integration, and UI/UX) across web and mobile platforms.
- **Defect Management:** Identify, document, and track software defects.
- **Client Collaboration:** Work closely with client development teams to communicate findings and ensure timely resolutions.
- **Quality Assurance Strategy:** Provide recommendations to clients on how to improve their internal QA processes and software lifecycle.

Qualifications

- Solid experience in Software Quality Assurance.
- Familiarity with various testing methodologies (Agile/Scrum) and bug-tracking tools.
- Strong analytical thinking and a "perfectionist" eye for detail.
- **Professional proficiency in French** is required to interact effectively with our French-speaking clients.
